ALEJANDRO PEREZ DURAN

apduran95@gmail.com | github.com/durantdurant95

SUMMARY

Experienced and proficient Software Developer committed to developing bleeding-edge software, ensuring high quality and great user experience in every product I collaborate on. I have a proven track record of delivering high-quality work on time. Also experienced in working with Agile methodologies and have excellent communication skills.

EXPERIENCE

GapAI   **Florida, USA (Remote)**

Frontend Developer   **Apr 2025 – Aug 2025**

- Built from scratch a Project-as-a-Service dashboard in Next.js enabling users to create and manage projects, workflows, and resources.
- Established a modern UI system with Tailwind CSS and shadcn/ui; implemented reusable component patterns and accessible UI.
- Orchestrated data fetching and caching with TanStack Query; integrated internal and third-party REST APIs; validated integrations with Postman.
- Delivered a Next.js site powered by Prismic CMS, designing reusable slices and content models so clients could compose sites from a shared slice library.
- Collaborated with product, design, and backend; contributed to reviews and documentation to support client self-serve usage.

Tech: Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, shadcn/ui, TanStack Query, REST APIs, Postman, Prismic CMS, GitHub, Visual Studio Code.

Middlesoft   **Montevideo, Uruguay (Remote)**

Frontend Developer   **Oct 2024 – Jan 2025**

- Built and maintained responsive internal dashboards with Next.js and Tailwind CSS to streamline operations and surface actionable insights.
- Managed state with Zustand and implemented efficient data fetching and caching via TanStack Query.
- Integrated REST services from a .NET backend and collaborated via Azure DevOps CI/CD pipelines.
- Created reusable UI components and interactive charts with Highcharts; optimized for performance and responsiveness.

- Worked cross-functionally; participated in sprints, code reviews, and continuous improvement under Agile (Scrum).

Tech: Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Zustand, TanStack Query, Highcharts, REST, .NET, Azure DevOps, GitHub, Visual Studio Code, Postman, Azure App Services.

Datamart   **Santiago, Chile (Remote)**

Lead Frontend Developer   **Feb 2023 – Sep 2024**

- Led frontend for embeddable banking experiences and internal dashboard tooling with a focus on performance and customization.

- Delivered lightweight web components using Preact and Material UI; built complex React apps with TypeScript.

- Modeled complex workflows using XState and managed app state with Redux Toolkit.

- Integrated GraphQL (AWS Lambda) and REST APIs; improved reliability of data fetching and error handling.

- Established and improved CI/CD (GitHub Actions); mentored developers and drove best practices.

- Managed private dependencies with AWS CodeArtifact; collaborated across teams under Agile (Scrum).

Tech: Preact, React, TypeScript, JavaScript (ES6+), Material UI, Ant Design, Redux Toolkit, XState, GraphQL, REST, AWS Lambda, AWS CodeArtifact, GitHub Actions, Visual Studio Code, Postman, AWS Infrastructure.

Smerida   **Florida, USA (Remote)**

Frontend Developer   **Jan 2022 – Dec 2022**

- Delivered customer-facing interfaces with Next.js and React in an MVC-inspired structure for clarity and scalability.

- Built reusable components and integrated REST APIs; focused on responsive, accessible UI and performance.

- Collaborated with backend engineers on API integration and debugging; contributed to reviews and documentation.

Tech: Next.js, React, TypeScript, JavaScript (ES6+), REST APIs, Visual Studio Code, GitHub, Postman.

EDUCATION

UNIVERSIDAD CENTRAL "MARTA ABREU" DE LAS VILLAS

Villa Clara, Cuba

Automation Engineering **Dec 2021**

- Diploma Thesis: "Reducción de artefactos de endurecimiento del haz de rayos X en imágenes de tomografía computarizada."

SKILLS & INTERESTS

Technical JavaScript (ES6+), TypeScript; React, Next.js, Preact; Redux Toolkit, XState, Zustand; TanStack Query; Ant Design, Material UI, Tailwind CSS, Highcharts; GraphQL, RESTful APIs; Storybook; .NET backend integration.

Cloud AWS (Lambda, CodeArtifact, general services), Azure (DevOps, Artifacts, App Services), Google Cloud (familiarity).

DevOps CI/CD pipelines (Azure DevOps, GitHub Actions), automated testing, TDD practices.

Tools Visual Studio Code, GitHub, Postman.

Interests Learning new technologies, continuous personal development, and software craftsmanship.

LANGUAGES

- Spanish: Native proficiency.
- English: Fluent and proficient, with strong written and verbal communication skills.
